

## ENVIRONMENTAL POLICY

We at East Midland Coatings Ltd are committed in all our working practices and business activities to protecting the environment both at local and global levels.

- To meet all specified legal and regulatory requirements that relate to our business.
- To ensure, through communication and continued training, that our employees and sub-contractors comply with this policy.
- To reduce our impact on the environment through the adoption of waste minimisation and recycling practices wherever possible.
- To reduce, wherever possible, our emissions to atmosphere using the best available techniques and constantly monitoring the availability of replacement plant and materials that have improved environmental impact.
- To protect the environment from pollution by employing safe practices when handling and sorting all material.
- To inform our customers and suppliers of our policy and objectives, and where possible, ensure that they are of the same mind.
- To establish systems to control and monitor our practices to ensure our objectives are met and enable a programme of continual improvement which will be driven by all members of senior management to the benefit of us all.
